Carl Hunt
Advertising Selling Counsel
816 State Life Building Indianapolis, Indiana

Those who deal with me say that a long newspaper and magazine writing experience, *plus* actual selling experience, *plus* experience in handling salesmen, *plus* my experience with the problems of many clients, enables me to go far beyond the mere preparation of good advertising "copy." My selling plans are of far greater value than the "copy." My fees are NOT low, but many others have found my services profitable. I can very likely make roses bloom in your bramble patch. Stafford Art Work

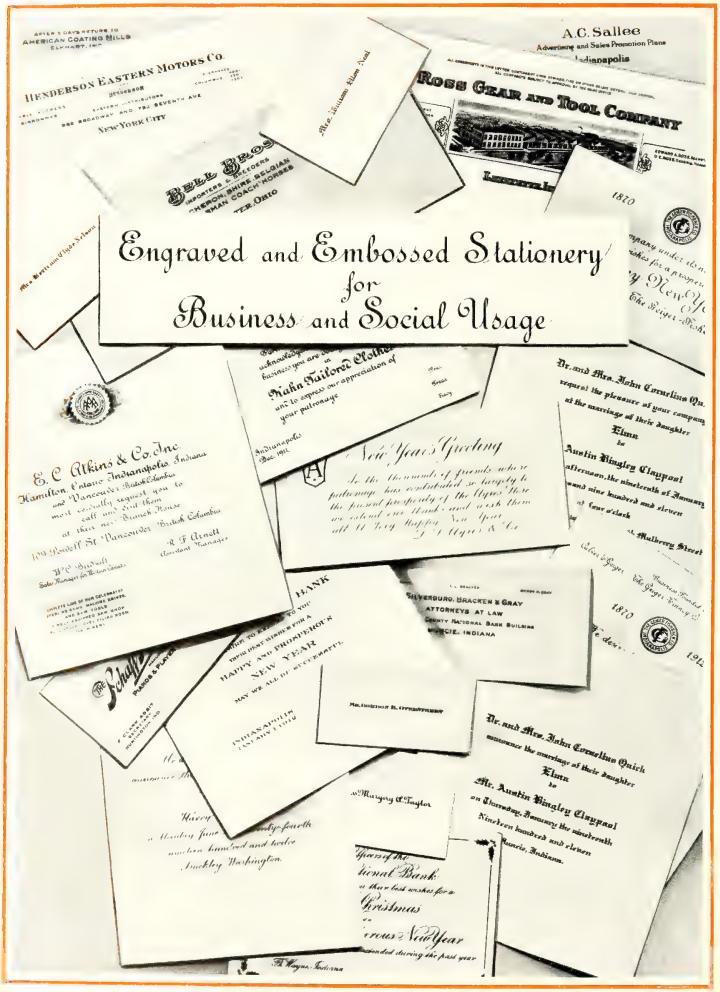
IT is one of the basic economic laws, governing human progress, that every individual can do some things better than he can do others. This is especially true of those whom we call "talented," and particularly true of artists.

The average commercial artist is a specialist in some particular line. It may be mechanical retouching, designing, lettering, figure work, pen and ink drawings, or any one of the many other lines. Put him on a job out of his line and he is like a fish out of water. Yet—

Modern conditions demand versatility of talent in an art department

The Stafford Art Department is made up of specialists in practically every line—artists skilled in designing; others excelling at figure work; some who do only lettering, bird's-eye view specialists, etc. Thus your order, if given us, will be executed by an artist who is especially trained to do that particular kind of work.



We do every kind of commercial illustrating, including:

Mechanical Retouching
Lettering
Wash Drawings
Pen Drawings
Letterhead Designs
Blotters
Cover Designs
Borders
Bird's-eye Views
Labels
Calendars, Hangers
Advertising Designs
Etc.

Modern Novelty All-Cast Warm Air Heater

Features of Special Merit

1. **Large Area of Heating Surface.** The area of the heating surface in this Heater is much greater than in most other cast radiator constructions. In many furnaces the area of heating surface is entirely inadequate for the proper heating of the required volume of air, resulting in a deficiency of heating power and causing a lack of durability in the construction.

2. **Proper arrangement of Heating Surface.** The Modern Novelty has the maximum amount of vertical and the minimum amount of horizontal heating surface, which promotes the rapid transmission of the heat to the volume of air passing through the heating chamber.

3. **Correct arrangement of Draft Travel.** The draft travel is sufficient to prevent an excessive temperature in the smoke exit, at the same time promoting a good bright combustion of the fuel. The top return central draft flue is a feature of marked merit not found in any other furnace.

4. **Absolutely and permanently Tight Joints.** All joints are of the deep cup type, and are packed with a pure soft asbestos, a can of which is furnished with each Furnace. All surfaces are so perfectly machined that there is a true contact at all points. This insures a gas proof and air tight installation.

5. **Strength and Durability.** Reference to the table of weights, as printed elsewhere in this pamphlet, will show that the Modern Novelty is extremely heavy. The weight is properly distributed to promote durability. The construction is heavy, durable and solid.

6. **The Double Fire-pot** is so constructed as to promote durability and its deep cup joints are perfectly and permanently tight.

7. **The Modern Novelty** is so constructed as to require no clean-out door or opening as all of the interior surfaces, except the top return flue, are self cleaning. The top return flue may be easily and conveniently cleaned through the rear check draft door.

8. **By a special device** attached to the shaker shanks of the grates, the usual openings around said shanks are tightly closed when the ash pit door is closed.

Modern Novelty All-Cast Warm Air Heater

DIMENSIONS AND CAPACITY

No.	*Estimated* Capacity in Actual Cubic feet in Building in Zero Weather	Height of Heater Cased Complete, Inches	Diameter of Firepot, Inches	Diameter of Casings, Inches	Height to Top of Radiator, Inches	Diameter of Smoke Pipe, Inches	Size of Cold air Duct Required, Inches
20-36	10-13,000	59	20	36	46	8	12 x 20
22-40	13-18,000	61	22	40	48	8	12 x 26
24-44	18-23,000	64	24	44	50½	9	12 x 30
26-48	23-28,000	67	26	48	52½	9	14 x 30
30-56	30-40,000	72	30	56	56	9	14 x 38

Our special form of Triplex Bar Grate is the best and most practical grate ever applied to a furnace.

There is a housing at left side of the Feed Door Chute through which a coil may be mounted for furnishing domestic water supply.

The Feed Door is of large capacity and ample height.

The Ashpit Door is unusually high, making it convenient to remove ashes and preventing the banking up of the ashes against the grate.

A Chain and Pulley Attachment is furnished for regulating the draft from an upper room.

An effective Dust Flue is provided, which may also be used as a draft check.

The economy of the Modern Novelty in the use of fuel is one of its strongest points of merit. The purchase price of a heater is paid but *once*, but the fuel to operate it is bought *annually*.

Explanation of the Novelty System of Heating and Ventilating

1. With the Novelty System perfect heating *and perfect ventilation* are accomplished at no greater cost than that of the unsanitary, unsightly plan of heating *without ventilation* by the direct radiation steam or hot water method.

2. The Novelty System provides definite, clear, absolutely correct rules for determining the right capacity of Novelty Heater to use in any given building, the right size and location for every pipe, flue, register, ventilating shaft, ventilating duct and cold air duct, and plain directions for carrying out every other detail of the installation of a perfect heating and ventilating plant.

These rules, while easily understood and easily applied, conform strictly to the scientific facts of heating and ventilating, and no case of failure has ever been registered against a plant installed in accordance with them.

3. The Heating apparatus specified and installed in a given case under the Novelty System not only has sufficient capacity to easily furnish the heat required without forcing the heater in the slightest degree, but it is also absolutely gas tight and extremely durable.

The joints of the Novelty Heater are few and every joint is a packed asbestos gasket joint, impervious to gas or smoke or dust.

4. Under the complete Novelty System, pure, warm air is poured into each room in large volume and at a comparatively low temperature, while the older, colder and impurer air is removed at the bottom of the room, conveyed to a ventilating shaft and thrown out of the building. The air in the house is constantly being renewed and its purity is assured.

Under the Novelty System perfect cleanliness as well as perfect purity of the air is maintained.

(The Novelty System must not be confounded with the ordinary "furnace job," which is frequently deficient in capacity, grossly faulty in installation and therefore unsatisfactory in results.)

Insuring Correct Installation of the Novelty System

The Novelty Furnace Handbook is the text-book of the Novelty System and contains complete directions which enable architects and heating contractors to install the Novelty System correctly in any residence or other building. We assume full responsibility for the Novelty System and our unqualified guarantee is back of every case in which it is installed.

Our Customers and Our Work

OLD Customers just send us their Work, Knowing by Experience that it will be Rightly Cared For and the Bill will be Reasonable.

¶ New Customers perhaps want Figures. These we are always glad to give. We go further and agree that, if the Handling of the Work costs us Less than our Estimate, we will give the Customer the Benefit of the Saving. We want only a Fair Profit on Our Work.

¶ We hold Customers, Old and New, by Fair Dealing, Quality of Work and Real Service.

¶ Special Attention to Catalogs, Booklets, Circulars, Three and Four Color Process Work, and All Kinds of General Printing.

THE SIGN OVER YOUR DOOR

Is a good thing, isn't it? You would not think of doing business without it. **BUT IT IS ONLY SEEN BY THOSE WHO PASS YOUR WAY.** If you could put a sign where every one could see it, would it interest you?

THE CITY DIRECTORY

Is where people look for you when they want to do business. You should make it easy for them to find you, by putting such information as a buyer wants, in the Directory properly indexed under all headings where he might look for you.

The National Real Estate Journal

¶ The National Real Estate Journal has created a decided stir in real estate circles. It has been widely read, widely quoted and widely talked about by real estate men everywhere.

¶ It has, by virtue of being the official organ of the National Association of Real Estate Exchanges, assumed its position of leadership in the real estate field, and is rapidly establishing its reputation for progressiveness and for filling its pages with the best, most interesting, entertaining and valuable information pertaining to the real estate profession.

¶ The National Real Estate Journal is a real estate institution. If you read it this year, you will want it next year, and the year after.

¶ The subscription price is $1.00 for the year—for 12 big, hearty, helpful numbers. Better send your dollar right now.

Do you realize that a City Directory advertisement is a testimonial to the permanency, the stability, of the advertiser?

That's the sort of concern all of us want to patronize, because we know when they sell us merchandise they are behind it in every way, today, tomorrow, and for the years to come.

"Fly-by-night," "fire-sale" and other temporary or *"get-rich-quick"* concerns rarely appear in the City Directory.

And it is a noteworthy fact that the concerns which advertise one year in the city directory are there again next year. 90% of directory advertising is renewed.

Directory advertising, is profitable. In connection with the classified business headings it is doubly effective.

May we explain how and why it will pay you?
